

VIRTUAL BIG GAMES RULES

5 OF 90 GAME RULES

In every draw, five (5) numbers are randomly drawn from a set of balls numbered 1-90. The first set of 5 numbers drawn are referred to as, “**the winning numbers**”, while the last set of five numbers drawn are referred to as, “**Machine numbers**”- Is used for forecasting or for prediction purposes only.

How to play the different, virtual 5 of 90 Games: - First ball, Direct , Permutation and One against all

With Direct, you can choose 2, 3, 4 or 5 lucky numbers between 1–90, then choose an amount to stake. To win, your numbers must match any of the 5 winning numbers drawn. The total numbers played determines your winning odds i.e. **1st No = N40, 2nd No = N240, 3rd No =N2,100 4th =N6,000, 5th No =N44,000**. The amount used in playing determines your total winnings e.g. 3Nos staked at N10 (10 x 2,100) wins you N21,000. Draws take place daily at one hour intervals and draw is done immediately. 7 days is required to redeem your winnings in case of any. T&C apply. Visit our website for more! Default ticket price is N10.

There are four types of **5 Of 90** games to be adopted. **a. FIRST BALL b. DIRECT c. PERMUTATION d. ONE AGAINST ALL.**

1. FIRST BALL: The player places stakes against the odds that a number he has chosen to play will match the first number drawn out of the five winning numbers .E.g. If a player has chosen to play 30 as his guaranteed number (“first ball”), it means that he has placed his stake on the certainty that number 30 will match the first number out of the five winning numbers that will be selected in the draw he has entered for. The odds are N40/N1 staked. E.g. for every N1 staked you win N40

2. i. 2-DIRECT: The player stakes against all odds that the two numbers he has chosen to play will match two out of the five winning numbers to be selected in the draw he has entered for. E.g. If a player has chosen to play 30&5, it means that he has staked on the certainty that numbers 30&5 will match two out of the five winning numbers that will be selected in the draw he has entered. The odds are N240/N1 staked. E.g. for every N1 staked you win N240

II. 3-DIRECT: The player stakes the odds that the three numbers he has chosen to play will match three out of the five winning numbers to be selected in the draw he has entered for. The odds are N2,100/N1 staked. E.g. for every N1 staked you win N2,100

III. 4-DIRECT: the player stakes the odds that the four numbers he has chosen to play will match four out of the five winning numbers to be selected in the draw he has entered for. The odds are N6000/N1 staked. E.g. for every N1 staked you win N6000

V. 5-DIRECT: the player stakes against the odds that five numbers he has chosen to play, will match the five winning number in the draw he has entered for. The odds are N44000/N1 staked. E.g. for every N1 staked you win N44000

3. i. PERMUTATION-2: player places stake in favor of any two numbers from a selected range of numbers e.g. amongst 11,13,24,90, which are numbers chosen to play, player places stakes in favor of the possibility that any two of these numbers selected will match two out of the five winning numbers to be selected at the draw. The odds are N240/N1 staked. E.g. for every N1 staked you win N240. Min of three numbers and Max of 20 numbers

II. PERM-3: player places stake in favor of any three numbers from a selected range of numbers e.g. amongst 11,13,24,90 same as described above. The odds are N2, 100/N1 staked. E.g. for every N1 staked you win N2,100. Min of four numbers and Max of ten numbers.

iii. PERM-4: players places stake in favor of any four number from a selected range of numbers e.g. amongst 11, 13, 24, 90, 78 same as above. The odds are N6000/N1 staked. E.g. for every N1 staked you win N6000. Min of five numbers and Max of ten numbers.

iv. PERM-5: player places stake in favor of any five number from a selected range of numbers e.g. amongst 11, 13, 24, 90, 78, 10. The odds are N44000/N1 staked. E.g. for every N1 staked you win N44000. Min of six numbers and Max of ten numbers.

4. ONE AGAINST ALL: Player places stakes in favor of any one number from one to ninety against the remaining 89 numbers, it means that he has staked on the certainty that numbers 30 will match any one number out of the five winning numbers that will be selected in the draw he has entered.
